

COMP10001 Foundations of Computing

Semester 1, 2020

Tutorial Questions: Week 2

— VERSION: 1455, DATE: MARCH 3, 2020 —

Discussion

Your tutor will be teaching your tutorial class this semester. Get to know a bit more about them:

- What do they study or where do they work? What do they hope to do in the future?
- What do they love about Computing? When did they discover that it's a thing they wanted to do?
- What is COMP10001 about in their opinion? Do they have any advice on doing well?
- **For you:** What do you hope to learn from this subject? Your tutor can tell you more about what you'll know in 12 weeks' time!

Questions from Week 1

1. What is a program? How do we write one? What does it mean to run it?
2. What is a programming language and why do we need one?

COMP10001 Bingo

Find someone who fits each category and write their name.
Try to fill every box!

Is in their first semester at UniMelb	Has done some programming before	Is doing COMP10001 as Breadth	Is from another country
Prefers pen & paper (Perhaps still prints their lecture notes)	Is looking to Major in Computer Science	Is a dog person	Is taking another subject that you're taking this semester (or has in the past)
Is a cat person	Has travelled to five or more countries	Has learned a second language	Sleeps 8 hours a night
Lives at College	Uses a search engine other than Google	Travels further than you do to Uni (if you travel the furthest you can write yourself)	Already has a green diamond on Grok
